Cambridge, MA 01451

3rd February 2012

Dear Charles,

Thank you again for your support of computerbasedmath.org, including speaking at our inaugural summit last November.

I have been encouraged to hear about your plans to create a Centre for Curriculum Redesign. As you know, a key focus for us has been to chart out how, in an era of ubiquitous computing, we should rebuild math education to keep pace with and drive progress in the real world. This will be a crucial component of your overall objectives.

From Wolfram Research technology, through to outreach such as MathWorld, to the free to use Wolfram|Alpha website and computerbasedmath.org project, we demonstrate a long-standing interest in fundamental education reform which we continue to accelerate into the future.

I am pleased that you see the importance to humanity of achieving these fundamental changes and I therefore thank you for your invitation to join your Board of Advisors. I will be pleased to accept with the understanding that my other commitments may preclude me from attending each meeting in person (as opposed by video).

Yours sincerely

Conrad Wolfram
