Hi, I’m Chris

Let’s take the Moon and make it shine for everyone.
HOW ARE YOU FEELING?

Let’s take the MOON and make it SHINE for everyone.
OUR VISION

TO USE THE POWER OF EMOTIONS TO CREATE A HEALTHIER AND MORE EQUITABLE, INNOVATIVE, AND COMPASSIONATE SOCIETY

Let’s take the MOON and make it SHINE for everyone.

SOCIAL AND EMOTIONAL LEARNING

A systemic approach to social and emotional learning

- Is theory-driven & evidence-based
- Provides training and support for all stakeholders
- Enhances mindsets, skills, culturally responsive pedagogy, and climate across all grade levels
- Moves away from standard piecemeal approaches (assemblies, classroom kits, “flavor of the month”)
- Infuses SEL into school mission, vision, and policies

@drchriscip Christina Cipriano, Ph.D.
THEORY OF CHANGE

- Improved leader & teacher effectiveness & retention
- Increased engagement, attendance, & academic performance
- Better relationships; reduced bullying
- Enhanced decision making; reduced drug, alcohol & discipline problems
- Less stress & anxiety; greater health & wellbeing

Training for school leaders, educators, & staff

Classroom integration across all grades

Infusion into mission & schoolwide practices & policies

Family Education

After school (OST)

Enhanced mindset ("emotions matter")

Deepened social & emotional skills

Healthier emotional climates in schools and homes

Teachers who participate in RULER demonstrate

- Improved attitudes. 
  (I like my job)
- Increased educational efficacy. 
  (I believe I make a difference in student lives by teaching)
- More engagement with peers and parents.

What do educators want to know about children’s development of emotion regulation skills?

There are a myriad of different emotion regulation strategies that could be effective and the “best” strategy will vary between individuals and across situations.

No one assessment could capture students’ knowledge about and ability to use all of these different strategies in a sufficiently nuanced way.

Let’s take the MOON and make it SHINE for everyone.
Focus on children’s ability to implement cognitive reappraisal – that research shows is effective in many situations and is linked to well-being.

Goal: Establish research-based benchmarks for children’s abilities to generate and use cognitive reappraisals to regulate their emotions in preschool through HS.
**Emotion Regulation Assessment**

- **Vignettes**: Validate the benchmarks - student developmental ability to identify the ER Strategy
- **Performance Based Assessment**: Can they use the strategies to regulate when induced (sticky key)

@drchriscip Christina Cipriano, Ph.D.
Can we benchmark high school student’s emotional experiences?

Can we provide in the moment intervention to support student emotion regulation?
TEACHER EMOTIONAL HEALTH AND WELLBEING

• What can we ask teacher’s at school about their psychosocial health?

• How can we support educators to live emotionally healthy lifestyles?
Emotions matter.

SEL programs help students and their teachers form and sustain better quality relationships, and improve both their respective psychological health and well-being.
IT’S NOT MAGIC, IT’S SCIENCE.
SEL is a pedagogical practice that shapes the child's brain and likely produces alterations that lays the foundation for promoting all future learning. Empirically validated.

Universal Design for Learning (UDL), a framework for inclusive and personalized learning, provides an evidence-based approach to define and address unequal access to SEL programming.

(Rose & Meyer, 2002, 2006)
The underlying premise of the UDL framework is that barriers to learning do not exist solely in the capacities of the learner, rather they occur within interactions between the learner and the learning environment.
“Universal” does not mean “one size fits all”

Cipriano, Brackett, Evans, Schlichtmann, & Barnes

Teacher themes and inclusion of UDL principles will be examined alongside Classroom Climate scores, Teacher, and Student measures.

Findings will provide the foundation for a systematic research investigation to develop and test the efficacy of RULER for SWD within general education classroom environments, creating artifacts and access points identifying where and how to improve SEL programming for SWD.
